

Fairy House

SCAVENGER HUNT

Fairies like houses made from treasures you find on the ground. Please don't pick growing plants!

Outside the Fairy House

Round Stones

Build a path to your fairy's home.

Twigs

Use for the home's walls and roof.

Leaves

Cover the roof with leaves to help the fairies stay dry in the rain.

Pine cones, nuts, or seed pods

What could the fairies do with these?

Inside the Fairy House

Pine Needles

Cover the floor in your fairy's home with pine needles.

Tree Bark

Make a bed or couch for your fairy.

Rocks

Make a table or chairs with different sized rocks.

Feathers or fallen flowers

Add color to the inside of your fairy home.

Let's Make a Fairy House!

You can build a home for the fairies that live in your yard or nearby park by using things that you have found in nature.

Gather items that you find on the ground in your yard or a park (see the Scavenger Hunt on the other side of this sheet). Use things that are no longer growing or alive. **Do not pick wildflowers or leaves that are growing on plants.**

Remember, fairies are very small, so the house that you build and items you collect should also be small. If you can't find the items on the list, use your imagination to create a fairy house with what is available to you. It's fun to decide what fairies would use for a bed or a table or even dishes!

Important Note: If you build your fairy house in your own yard, you may leave it for fairies to use night after night and keep adding to it as you find new things. However, if you are in a public place or park, please dismantle the house before you leave.
